About

I changed careers into software engineering to help make the world just a tiny bit better through better access to technology . I am a community builder creating a server for studying that has 200+ members and roughly 2 mil post views on LinkedIn and I also make app boilerplate code for free use to anyone.

Employment

Web Application Software Developer - *Upwork - Remote*

October 2021 - Current

- Freelance software dev to create robust, complex UI SaaS interfaces, translating wireframes into UI
- Working in Vue.js and predominantly React.js, using Vuetify, Bootstrap, Semantic UI, and Material UI
- Meeting with clients to get input and answer questions for design and implementation of client designs
- Creating API routes with axios, RESTful routing, using MySQL, AWS, and Github

React Website Developer - *HelloPatients - Remote*

November 2021 - February 2021

- Fundamental role on small development team to rewrite a web-based app from Angular into React
- Self-accountable for time management/ticket completion, meeting attendance, and daily standups
- Work collaboratively across all development teams with Git version control locally and in the AWS cloud
- Collaborate with C-suite employees and product/sales team to gain direction/implement new ideas
- Work extensively with state management through hooks, and creating and utilizing API calls
- Work extensively on the JSX files to create/debug UI utilizing Bootstrap and Semantic UI
- Work extensively on implementing components, and creating/implementing new custom components

Wix Website Developer - *QueerCoded - Remote*

October 2021 - Current

- Create website applications in Wix and Wix Editor X, implementing user designs and requirements
- Working on front-end and back-end to implement custom Javascript scripting to improve user experiences

Mobile Application Software Developer– *Club Soda, Inc.*

July-August 2021

- Worked with an acquaintance on their personal project for their pre-formation startup
- Worked on creating and perfecting user stories to optimize user experience
- Working extensively on front-end software development and stylization to further optimize user experience
- Isolated, replicated and fixed user-flow bugs/issues/tickets that impeded user flow and/or stylization errors
