Experience

React Website Developer - *HelloPatients* - Remote

November 2021 - January 2021

Front-End | React | MySQL | Javascript | AWS | Angular | TypeScript

- Fundamental role on small, on-shore development team to rewrite a web-based app from Angular into React
- Self-accountable for time management/ticket completion, meeting attendance, and daily standups
- Work collaboratively across all development team members with Git version control locally and in the AWS cloud
- Collaborate with C-suite employees and product/sales team to gain direction/implement new ideas
- Work extensively with state management through function based syntax and useEffect life cycle method
- Work extensively with API calls, as well as creating new calls and debugging the current API
- Work extensively with the file system of the app, creating new files as needed/required/requested
- Work extensively on the JSX files to create/debug UI utilizing Bootstrap and Semantic UI
- Work extensively on implementing already created components, and creating/implementing new custom components

Wix Website Developer - *QueerCoded* - Remote

October 2021 - Current

Fullstack-Website developer | Wix | Editor-X | Javascript

- Wrote 4 full websites for various clients
- Working as freelance software developer to create website applications in Wix and Wix Editor X
- Worked on implementing user designs and requirements
- Working on front-end and back-end to implement custom Javascript scripting to improve user experiences

Web Application Software Developer - *Upwork* - Remote

October 2021 - Current

Front-End | Vue.js | Vuex | Javascript

- Working a freelance software developer to create website applications, focusing on creating the front-end of apps
- Meeting with clients to get input and answer questions for design and implementation of client designs
- Working on front-end in Vue.js/Vuex and Javascript

Mobile Application Software Developer- *Club Soda, Inc.*

July-August 2021

Full-Stack | React-Native | AWS | Git/GitHub | CloudWatch | DynamoDB/GraphQL/Elasticsearch/Kibana | XCode

- Worked with an acquaintance on their personal project for their pre-formation startup
- Worked on creating and perfecting user stories to optimize user experience
- Working extensively on front-end software development and stylization to further optimize user experience
- Isolated, replicated and fixed user-flow bugs/issues/tickets that impeded user flow and/or stylization errors
